

OPERATION

Be sure to familiarize yourself with all aspects of the Operation Screen. You'll need a solid understanding of this information to successfully complete each procedure.

1. Special Item Tray

Any items which must be placed inside the patient will be given to you via this tray.

2. Vitals

The patient's vitals. If the number reaches 0, the patient may be in jeopardy if you don't act quickly.

3. Surgical Instruments

These are the tools available to you during the operation.

4. Message Window

At important points of a procedure, your assistant may chime in with additional instructions or a friendly reminder. By pressing the - Button, you'll be able to fast-forward through any messages. Press the - Button again to return the message speed to normal.

5. Time Limit

The time limit for the current procedure. If time runs out, you'll automatically fail the operation.

6. Score

Your current score. It will increase depending on how well you perform the operation.

7. Chain

The number of steps you've completed in a row without making a mistake.

8. Retrieval Tray

When you remove a foreign object from a patient, place it in this tray.

9. Cursor

The cursor will be displayed wherever you're pointing the Wii Remote.

10. Operation Field

The affected area you'll operate on.

OPERATING IN CO-OP MODE

1. Player 1's Surgical Instruments

2. Player 2's Surgical Instruments

3. Player 1's Pointer

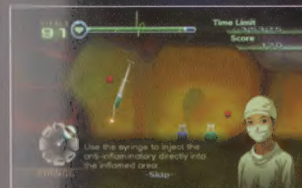

4. Player 2's Pointer

NOTE: Player 2's pointer is a different color than Player 1's.

Overusing Your Instruments

It's possible to overuse a surgical instrument, in which case the tool may become temporarily unavailable. You can check the condition of your instruments by noting the color of the corresponding icons.

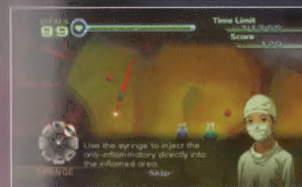

▼ Instrument Status Change

Normal condition

Slight overuse

Severe overuse

Temporarily unusable
